

Tsunami Hits California Coast -- Watch it Live on Mission Beach Web Cam March 11, 2011

A Tsunami generated by an 8.9 earthquake in Japan is hitting the coast of California. Watch it unfold at UltimateBeachHouse.com's live beach cam. The series of Tsunami waves began to hit San Diego beaches at 8:45 am and will be seen live for 10-12 hours.

A Tsunami generated by an 8.9 earthquake in Japan is hitting the coast of California. Watch it unfold at UltimateBeachHouse.com's live beach cam. The series of Tsunami waves began to hit San Diego beaches at 8:45 am and will be seen live for 10-12 hours.

According to new reports coming in from Japan, the Tsunami is generating a series of tidal surges. The first waves to hit San Diego happened at 8:45 am and measure only a foot or two. "The first thing we noticed was a lower than expected tide. The tide was about a foot or two lower than predicted by standard tidal charts. Then at 8:40am the water began to rise" said Mark Bustamante, Owner of UltitmateBeachHouse.com
